ACTIVATE ALERT

# Campus-Wide Lockdown Alert

# CrisisAlert is Used Primarily for Everyday Emergencies

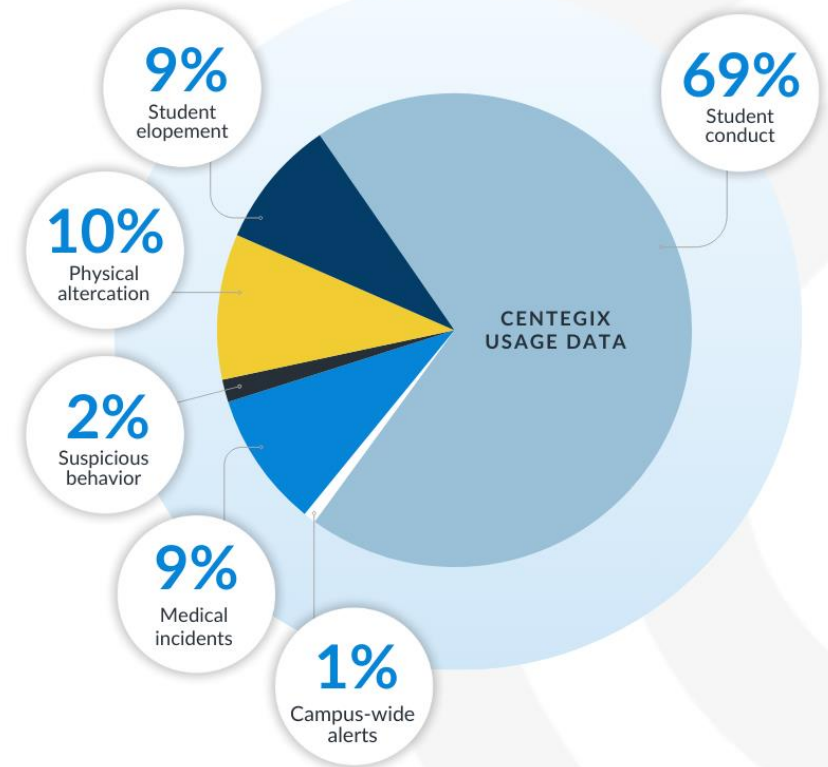

**69%** of safety incidents are for student conduct

**9%** of safety incidents involve a medical emergency

**10%** of safety incidents involve a physical altercation

# Powering the Network

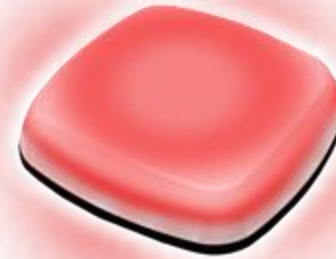

## Gateway

- Pre-configured and shipped (2 per site)
- Requires POE exterior network drop
- District or certified vendor installs on network
- Battery backup

## Badges

- Deployed to staff by district
- Vibration upon activation
- Activated/deactivated at local school
- Year+ battery life

## Strobes

- Installed by CENTEGIX
- Wire-free installation
- Waterproof
- High impact
- Multi-year battery life

## Locating Beacons

- Installed by CENTEGIX
- Wire-free installation
- Waterproof
- High impact
- Multi-year battery life

# Key Differentiators

## ONE-BUTTON ACTIVATION

The wearable badge has an accessible, single button enabling quick action under duress.

## LOCATION ACCURACY

Alerts are visible on a digital map, down to the individual room and floor. First responders know exactly where they are needed.

## IMMEDIATE NOTIFICATION

Campus-wide alerts are immediately sent to administrators and first responders with no time lost.

## INDEPENDENT OF WI-FI/CELLULAR

On a private, installed network, separate from wi-fi and cellular, that connects badges, strobes, intercoms & more.

## AUDIO & VISUAL NOTIFICATION

Campus-wide alerts communicate an emergency using strobes, desktop alerts and intercom integration.

## TOTAL FACILITY COVERAGE

Network covers every square foot of campus, no dead zones. Badges work in the classroom and on the ball field.
