

# Beyond the Badge

Accelerate emergency response with CENTEGIX CrisisAlert.™

	 CENTEGIX®	Others	Why This Matters
100% Campus Coverage	Yes	No	Emergencies can take place anywhere on campus. With CrisisAlert, staff can initiate alerts anywhere, from patient rooms to stairwells to parking garages.
Incident Location Accuracy	Precise location shared immediately with responders	Cannot differentiate between floors	CrisisAlert delivers precise location identification to responders, who can also see all safety assets near the incident location to accelerate a response.
Wi-Fi or Cellular to Initiate Alert	No	Yes	Wi-Fi limitations and weak cell signals, common in hospitals and other healthcare settings, can result in messages not being sent or received, contributing to critical communication breakdowns.
RTLS	No	Yes	We do not continuously monitor badge location. Locating abilities are only activated when a user presses the button on their badge.
Battery Life/Charging Required	Badge battery lasts for years and does not require charging	Require charging and/or battery monitoring	A device that must be recharged—whether daily or monthly— is vulnerable to being powerless or connected to its charging device and not accessible when needed.
Customizable Visual/Audio Cues and Integrations	Yes	No	Campus-wide alerts can be tailored to suit your needs, including desktop takeovers, intercom messages, strobe initiation, PSAP integration, and more.
Safety Platform	Duress badges, digital incident mapping, visitor management, and integrations	Point solution	CENTEGIX Safety Platform is the foundation for your workplace violence prevention plans. CrisisAlert enables your staff to get help anytime they need it, anywhere on campus, and ensures the fastest response times.
Experience	600K+ badges in use 10M+ people protected across 12K+ facilities	Limited	Years have been spent implementing and training staff and responders to maximize adoption and effectiveness. Innovations based on customer feedback have led us to become the leader in wearable safety technology.
Usage	Over 375,000 alerts delivered	Data not published	98% of users say CrisisAlert helps them feel safe and supported. 100% say it's easy to use.
