CENTEGIX® SAFETY PLATFORM®

Beyond the Badge

Accelerate your response to emergencies with CrisisAlert™ and the CENTEGIX Safety Platform®.

	CrisisAlert	Other Wearables	Why This Matters
Strobes for Visual Notification and Incident Location Accuracy	Strobes provide floor- and room-level alert locations displayed on digital campus maps	Minimal or no strobes; Can't provide precise alert location info	Flashing strobes in every room, hallway, and common area provide an immediate visual cue a Lockdown has been initiated. Responders receive precise real-time location information of the alert and nearby safety assets to accelerate their response.
Additional Notifications	Yes	No	Intercom announcements and computer screen takeovers provide immediate additional audio and visual notifications of a Lockdown and Lockdown protocols.
Doesn't Rely on Wi-Fi or Cellular to Initiate an Alert	Yes	No	Communication gaps due to unreliable Wi-Fi and cellular can result in critical communication breakdowns.
100% Campus Coverage	Yes	No	About 50% of emergency incidents take place outside the classroom. Staff can initiate an alert from anywhere on campus, indoors or outdoors.
Battery Life/ Charging Required	Battery lasts for one year+ and does not require charging	Requires charging	A device that must be recharged—whether daily or monthly—is vulnerable to being powerless or connected to its charging device and not accessible when needed.

"

Our District is adding a layer of safety with the CENTEGIX CrisisAlert wearable badge for Alyssa's Law, gaining the on-site notifications—strobes, computer screen takeovers, intercom announcements—that initiate our emergency protocols and direct everyone on campus to follow their safety training.
