

Beyond the Standard: The CENTEGIX® Advantage

CENTEGIX Safety Platform® Provides	Why This Matters
<p>Total Staff Adoption</p>	<p>Wearable badges enable total staff adoption and eliminate the technical barriers of mobile apps. Help is always available at the push of a button for every employee, anywhere on campus.</p>
<p>Real-Time Location & Native Mapping</p>	<p>First responders receive precise, real-time location details for the alert, accelerating coordination and response. 911 dispatch receives the digital campus map, providing off-site personnel with immediate situational awareness.</p>
<p>Wireless Strobes for Visual Notification & Incident Location Accuracy</p>	<p>Flashing wireless strobes in every classroom and common area, and down all hallways provide an immediate visual indication that a campus-wide alert has been initiated. This ensures awareness for ALL staff, students and visitors, even in restrooms, gyms or the cafeteria where announcements may not be heard. Unlike other providers' hardwired third party strobes, CENTEGIX strobes are included as standard and require no wiring, thereby avoiding hidden IT costs and allowing installation in hours versus days or weeks.</p>
<p>Additional Notification Channels</p>	<p>Intercom announcements and computer screen takeovers deliver immediate audio and visual alerts, clearly communicating campus-wide alerts and reinforcing response protocols.</p>

CENTEGIX Safety Platform® Provides

Why This Matters

100% Campus Coverage—No Wi-Fi or Cellular Required to Initiate an Alert

About 50% of emergency incidents occur outside the classroom. Safety Platform enables staff to initiate alerts from anywhere on campus, indoors or outdoors, without relying on Wi-Fi or cellular connectivity. This eliminates communication gaps that can delay response during critical moments.

Fast & Easy Installation

With thousands of district-wide deployments completed, including 4 of the 10 largest school districts in the U.S., CENTEGIX can be installed in a standard school within hours and across large districts in weeks. Our deployment model scales efficiently without burdening IT teams or requiring major infrastructure overhauls.

Stress-Free Maintenance & Complete Service Coverage

CENTEGIX owns and supports the hardware end-to-end. If an issue arises, our team comes onsite to resolve it. Badges, strobes, and all supporting hardware are CENTEGIX-manufactured and managed—no third parties, no finger-pointing, no added complexity.

Years of Daily, Real-World Usage

98% of CrisisAlert activations are used for everyday medical and behavioral incidents, reinforcing familiarity and confidence so the system is second nature when a true emergency occurs.

No Hidden Costs

Our solution does not require wiring, network drops, or changes to infrastructure. We don't charge an additional fee for installations, integrations, or strobes.

5-Year Price Lock

5-year transparent, stable pricing helps deliver financial predictability. CENTEGIX protects both your budget and school communities with no annual price escalations.

Actionable Data & Reporting

Safety data empowers informed decision-making across the district, from board reporting and staffing strategies to compliance documentation and individualized education planning.
