

A Stronger Safety Infrastructure for Corrections

Correctional leaders are responsible for protecting those working in some of the most demanding public safety environments. Yet when an incident occurs, traditional radios and duress buttons can make it difficult to quickly see who needs help and where response is needed.

CENTEGIX Safety Platform® closes that gap, with wearable duress badges for every employee and precise locating abilities that ensure everyone can get help when they need it.

WHAT INVESTING IN OFFICER SAFETY DELIVERS

Faster Response

Alerts instantly show who needs help and where they're located.

Facility-Wide Safety

Discreet, wearable badge for all staff allows users to signal for help anywhere.

Operational Visibility

See incidents as they unfold and coordinate an effective response.

Actionable Data

Identify trends that better inform safety decisions and incident prevention.

PROOF IN PRACTICE

1 State.
10 Facilities.
One connected approach to officer safety.

TENNESSEE DEPARTMENT OF CORRECTION

TDOC is deploying the CENTEGIX Safety Platform® across all 10 state-operated correctional facilities, connecting local response with its 24/7 Corrections Safety Intelligence Center in Nashville. The result is a connected safety infrastructure designed to provide:

- Precise alert location
- Centralized visibility
- Immediate notification
- Coordinated response

With this deployment, every officer and staff member in our facilities will be able to summon help instantly and receive a coordinated response in real time.

- Frank Strada, Commissioner, Tennessee Department of Correction

THE OUTCOME

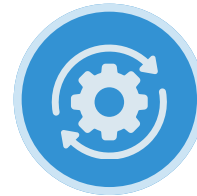

The investment goes beyond emergency response

CENTEGIX Safety Platform® connects alerting, precise locating abilities, response coordination, and actionable data to help corrections agencies better protect their people and strengthen safety operations.

Protect your workforce

Give officers and staff confidence that help is always accessible, when and where they need it.

Strengthen operations

Improve awareness and coordination during disturbances, medical emergencies, and other incidents.

Support recruitment and retention efforts

Demonstrate that employee safety is an organizational priority.

Better inform long-term safety decision-making

Turn incident data into intelligence by identifying risks and trends.

“

The CENTEGIX system ensures that even if a deputy is unable to reach their radio, assistance can be dispatched immediately. This is another step forward in using technology to strengthen our response capabilities and create a safer environment for everyone inside our facilities.”

- Sheriff Chad Chronister, Hillsborough County
