

THE COMPLETE K-12 SAFETY PLATFORM®

Safe in the everyday moments. Ready for the emergency. One platform.

From daily operations to emergency response.

Most school emergencies happen during everyday moments. Medical incidents, behavioral concerns, and student altercations far outnumber the worst-case scenarios. That reality is why CENTEGIX® built a platform for the entire school day, not just its hardest moments. Safety is no longer just a response issue. It is a school improvement issue. When educators feel supported, schools thrive.

The CENTEGIX Safety Platform® connects daily operations, emergency response, and prevention in a single system. Every staff member wears a CrisisAlert™ badge. Every visitor is screened and located. Every drill, every alert, even reunification, runs through one connected platform with one accountable partner.

Other solutions manage moments. CENTEGIX protects your entire day.

Arrival > Visitors > Hall Passes > Emergency > Dismissal > Home Safe

01

Control the day-to-day

Visit, visitor management, Hall Pass, Dismissal, and Attendance keep ordinary operations orderly and visible.

02

Respond immediately

CrisisAlert puts help one button away for every employee, with campus-wide notifications possible within seconds.

03

Prepare and prevent

Safety Blueprint® mapping, drill management, and analytics turn every event into readiness.

A unified platform also removes the cost and confusion of fragmented vendors: one login, one training investment, one contract, one support team, and a full audit trail across every safety moment.

RESPOND IMMEDIATELY

CrisisAlert®: Push Button Help Comes.®

The CrisisAlert badge was designed for high-stress situations.

There is no phone to unlock, no app to open, and no procedure to remember. Every employee wears one, and it works everywhere on campus: stairwells, athletic fields, parking areas, and playgrounds. Alerts do not depend on Wi-Fi or cellular coverage, and the multi-year battery never needs charging.

Staff alert Help for the everyday

A triple-press sends a discreet alert only to onsite responders, with the wearer's name and precise location down to the room number, delivered to responders' desktops and phones. It doesn't call 911 or trigger a lockdown. This is the alert staff use most, for medical emergencies, altercations, elopement, and behavioral concerns.

Campus-wide alert Everyone knows instantly

Because you never know who will spot a serious threat first, every badge can initiate a campus-wide lockdown with eight or more clicks. This instantly activates strobes in every room, takes over computer screens and intercoms, and alerts on-site responders and 911 with precise location and always-up-to-date digital maps. Everyone on site knows exactly what is happening and can act without delay.

Reducing response times from 4 minutes to 40 seconds.

We didn't just set the standard. We built it. This is what makes CrisisAlert different.

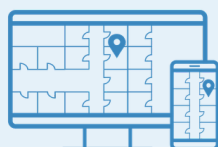

100% Campus-Wide Coverage

Multi-Sensory Notifications

A Badge for Every Employee

Dynamic Digital Mapping

One Connected Platform

PREPARE AND PREVENT

Ready before it matters most

SAFETY BLUEPRINT® Give responders the full picture

Live digital maps show the alert location, entrances, exit routes, cameras, and nearby safety assets. When an alert activates, responders can see surrounding assets for greater situational awareness.

DRILL MANAGEMENT Practice like it's real

Launch Hold, Secure, Lockdown, Evacuate, or Shelter drills from one platform. Strobes, announcements, and screen takeovers activate automatically, helping staff and students build muscle memory.

ACTIONABLE DATA Turn every alert into insight

Every alert captures who, what, when, and where. Trends across behavioral, medical, and staff-assistance incidents help leaders focus resources where they're needed most and strengthen readiness over time.

CONTROL THE DAY-TO-DAY

Safer in the ordinary moments

ATTENDANCE Accurate rosters, instantly

Digital attendance keeps class and campus rosters current, eliminating administrative burden and ensuring emergency headcounts are trustworthy.

HALL PASS Know who is out and where

Digital passes replace paper: staff approve and track student movement in real time, with limits and history that curb hallway incidents.

VISITU Visitor management, simplified

Visitors check in at a kiosk or on their phone. IDs are screened, badges print automatically, and staff can see who is on campus in real time.

DISMISSAL The busiest 20 minutes, organized

Automated dismissal coordinates car line, bus, and walker release, cutting wait times and keeping students with approved guardians.

EMERGENCY RESPONSE

Faster when Every. Second. Matters.®

ALERT-ACTIVATED VIDEO See what's happening, instantly

Nearby camera feeds surface automatically when an alert activates, helping responders quickly understand what's happening and act with greater situational awareness.

REUNIFICATION Families reunited, safely

Digital reunification validates custody, tracks each student's status in real time, and creates a complete record—helping schools reunite families faster and with less confusion.

PROVEN AT SCALE

Trusted where it matters most

32

Of the 100 largest districts

Independent 2025 research confirmed a Net Promoter Score four times the national average for school safety providers, and customer retention above 99%.

"It's a game changer. You know the exact location and you know who, so there's no trying to figure out, grabbing walkies, who initiated the alert, who did what. You just go."

-Johnson Joseph, Assistant Principal, Duval County Public Schools

A guided partnership, start to finish

CENTEGIX handles complete installation, proactive 24/7 device monitoring, and all ongoing maintenance at no additional cost. A dedicated CENTEGIX Onboarding Specialist is a single point of contact through planning, installation, configuration, testing, and staff training. After go-live, your Account Manager and the CENTEGIX Command Center provide monitoring, software and firmware upgrades, remote training, and an annual site health evaluation. Spare badges are included at no additional cost.

CENTEGIX pioneered wearable safety and continues to lead the space. One platform. One badge. One accountable partner. We would be honored to earn that role for your school community.

Everyone home safe.
